

## standard kit - round series

The handles are complements of door furniture. Its shape and material are sometimes able to express emotion and sensuality.

Handles, backplates, hinge-caps, ring knockers - are the accessories that complete a security door. These objects reflect the personality and identify the style life of the people who inhabit the house.

Handles are available in round and square shapes, with classic and modern design, with satin, polished and antique brass effect finishing, in different colors.

## classical central door-handles

The new, so-called universal design central door-handles, can be integrated with a wide range of flat panels, eventually embellished with bands or inserts, giving a charming and shining touch to the door.
