

They have great anti-burglary features according to EN 356 norm with P6B classification and they are CE marked in compliance to EN 14449.

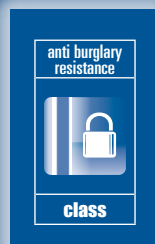

Our laminated security glazing are a combination of different glass sheets assembled one another with variable thickness from 32 mm to 42 mm.

The increase of thickness brings also an improvement on thermal and acoustic performances of the door.

Our ***laminated security and shatterproof glasses*** has been tested according to EN ISO 12543-2

Vighi's doors keep the anti-burglary resistant class also in windows, sidelight and fanlight versions.

in the leaf, also in combination with grate

in the side-light and fanlight

with English style moulding

according to customized design
